

# gldm HighGrayLevelEmphasis

Robustness: Conditionally robust

Operational range: Present

Feature correctability: Not correctable

## Feature variability and correlation against parameter across pairwise combinations of width of bins

0.000.250.500.751.001.251.50

First element of pair (width of bins)

Second element of pair (width of bins)

1.5

1.0

0.5

## Overall robustness across pairwise combinations of width of bins

0.050.100.150.200.250.300.350.400.450.500.550.600.650.700.750.800.850.900.951.001.051.101.151.201.251.301.351.401.451.50

First element of pair (width of bins)

0.050.100.150.200.250.300.350.400.450.500.550.600.650.700.750.800.850.900.951.001.051.101.151.201.251.301.351.401.451.50

Second element of pair (width of bins)
