

glszm SizeZoneNonUniformity

Robustness: Conditionally robust
Operational range: Present
Feature correctability: Moderately correctable

Feature variability and correlation against parameter across pairwise combinations of Linear-interpolated voxel sizes

Overall robustness across pairwise combinations of Linear-interpolated voxel sizes

Original

Feature value (rescaled)

Linear-interpolated voxel size, S (mm)

$r_{rm} : -0.566 [-0.585, -0.546]$
