

glszm SmallAreaEmphasis

Robustness: Conditionally robust
Operational range: Present
Feature correctability: Moderately correctable

Feature variability and correlation against parameter across pairwise combinations of Linear-interpolated voxel sizes

Overall robustness across pairwise combinations of Linear-interpolated voxel sizes

Original

Feature value (rescaled)

Linear-interpolated voxel size, S (mm)

$r_{rm}: 0.937 [0.934 , 0.941]$
