

glszm GrayLevelVariance

Robustness: Conditionally robust

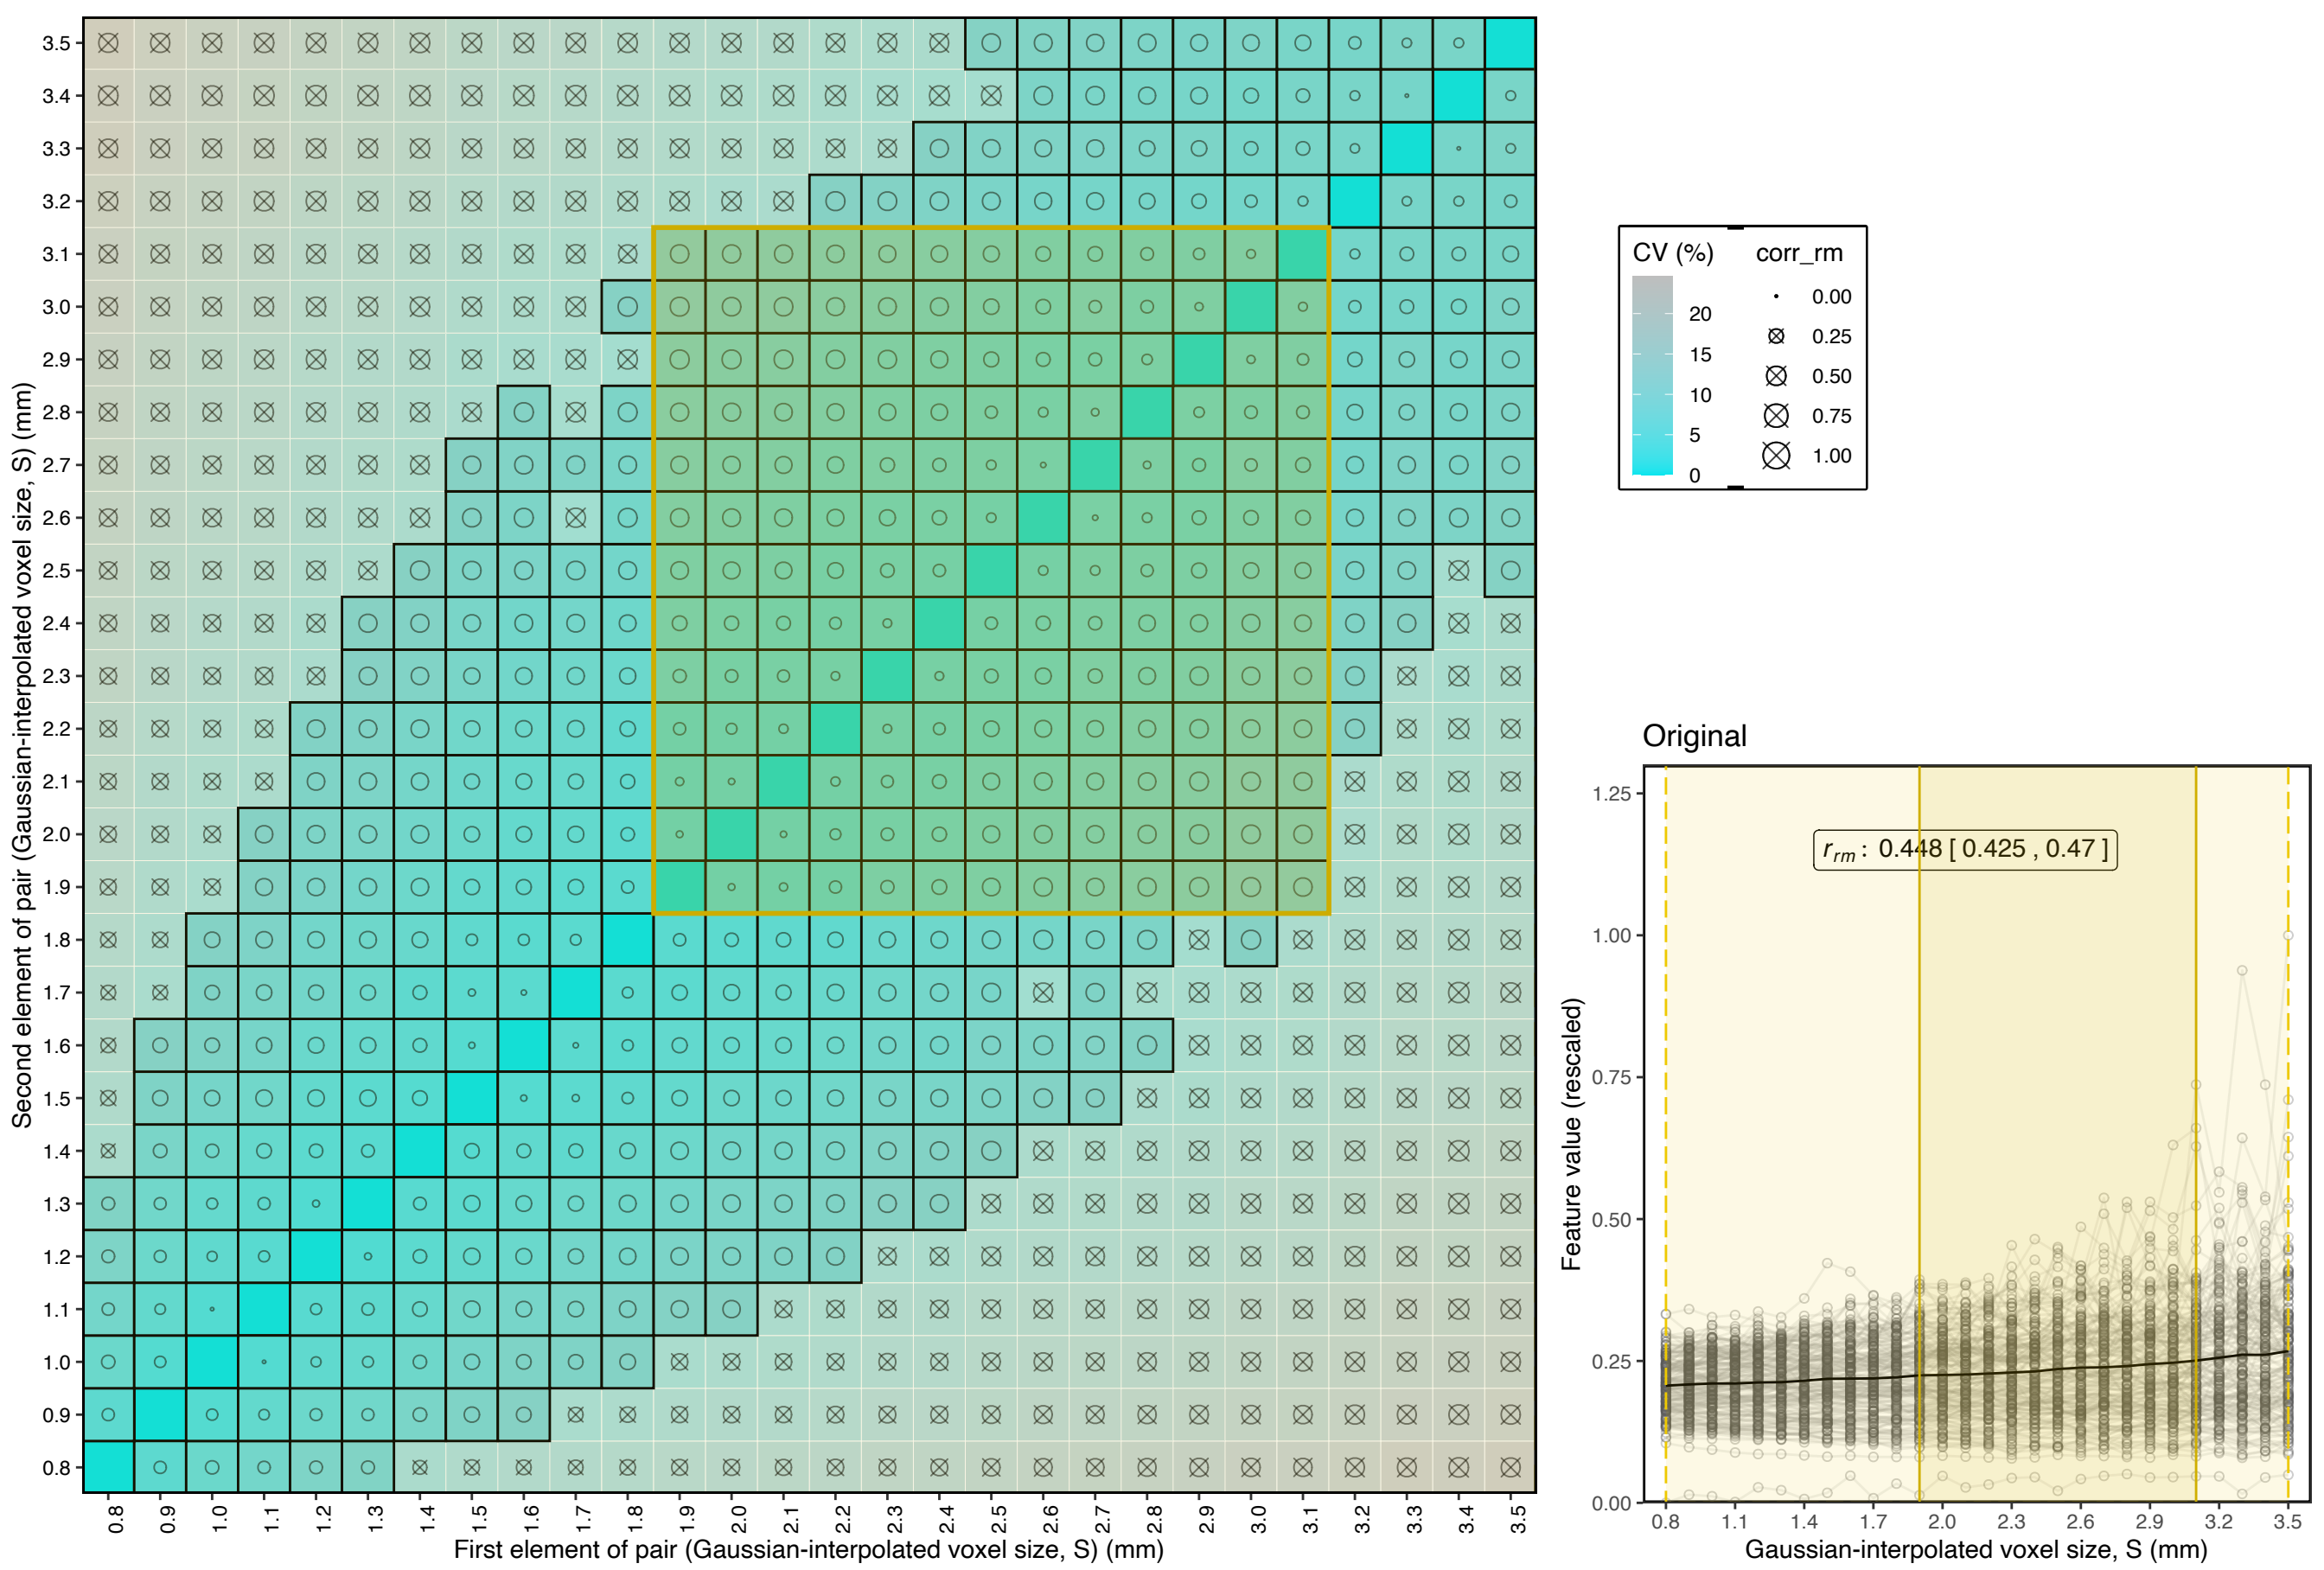

Operational range: Present

Feature correctability: Correctable

Feature variability and correlation against parameter across pairwise combinations of Gaussian-interpolated voxel sizes

Overall robustness across pairwise combinations of Gaussian-interpolated voxel sizes

Original

Feature value (rescaled)

Gaussian-interpolated voxel size, S (mm)

$r_{rm} : 0.448 [0.425, 0.47]$
